Colder temperatures call for all types of ways to warm up and beautify your interior. Turn to Wagner and all their tools for inspiration and exceptional products that simply get the job done. Follow along in this issue for complete step-by-step instructions to create finishes, spray decorative walls, or handcraft clever ornaments and gifts for everyone on your list. Unleash your abilities with sprayers, rollers, and heat guns. Give them as gifts this holiday season, or get them for yourself and get on with making something beautiful at home throughout the winter season.

Striped floor with SMART Edge roller.

Winter needs wonder and Wagner.

Finish a weekend of painting by Saturday noon.

The Wagner FLEXiO® 3000 sprayer delivers a smooth, consistent finish to almost any surface, from garage doors to bathroom walls, from fences to living room ceilings. It has the power to spray any paint or stain straight from the can with speed and control. It’s time for a smarter way to paint. Learn more at WagnerFlexio.com.

FINISH with Wagner is a digital look book published quarterly.
Is your brick fireplace or wood stove wall looking a bit too *Brady Bunch*? Change it up with a quick spray of chalk paint using the Studio Pro or FLEXiO® 5000 sprayer. Both sprayers spray chalk paint with ease and can instantly bring your brick facade into the current decade.

To begin, cover the floor surrounding the brick facade with a drop cloth and use painter’s tape to cover corners and items you want to keep paint-free. Then, clean off the brick with a whisk broom and vacuum crevices to remove all loose dirt and dust.

Fill the front end of the paint sprayer with the paint color of your choice. We used Annie Sloan chalk paint in Paris Grey.

Begin close to the ceiling and spray in a horizontal pattern from left to right, keeping the sprayer about three inches away from the surface. Repeat and overlap to cover thoroughly.

To paint the surface of the floor, hold the paint sprayer downward at a 45-degree angle.
Dress up a guest room for winter fun with a mix of Wagner paint tools and a plethora of decorative treatments.

Using Paint

Big paint projects may require a few gallons to transform an entire room, but Wagner paint sprayers use paint more efficiently than a brush and require a third less paint than a traditional roller.

Why just paint a wall when you can wallscape it? Employ your Wagner paint tools and, in just a few steps, give your room a fresh new shade and a graphic design that will pop. Let these versatile tools use paint wisely and leave you with your own personal design style.
1. Tape off any exposed areas that you want to keep paint-free and spread drop cloths to protect the floor. Paint the interior of each wainscot panel on the wall-mounted headboard with the cream paint and the Wagner SMART Edge Roller. Let dry completely.

2. Place the snowflake cutouts on the wall and within the wainscot panels in a random pattern using pushpins to hold them in place. Once removed, these stencils will leave snowflake shapes on the wall in the cream color.

THE MISSION

Use color to refresh a little-used guest room for winter guests looking for a getaway.

THE MATERIALS

Wagner FLEXiO® 3000
Wagner SMART Edge Roller
Snowflake cutout
Push pins
2 gallons red paint in a flat latex finish
1 quart cream paint in a flat latex finish

A dated headboard and boring wall get an easy redo in just a short amount of time.

A sprayer makes efficient use of paint in a larger room project.
Using a ladder, begin painting at the very top of the wall with the Wagner FLEXiO® 3000 paint sprayer. Spray in an unlettered horizontal pattern across the wall, keeping the front end of the sprayer 3–5 inches away from the wall surface. Spray over the entire wall, stencils, and the mounted headboard.

Let dry thoroughly and then remove snowflake cutouts and any painter’s tape.

Easy as 1-2-3.
Brighten a dingy and dark floor with a fresh color and easy country pattern.

**THE MISSION**

Load the Wagner SMART Roller with the tan paint. Roll the plank floor with the roller, beginning in a far corner of the room. Paint the surface until completely covered. Let the floor dry overnight and repeat with a second coat. Let dry thoroughly.

2. Tape the stencil to the floor using a low tack painter’s tape. Load the Wagner SMART Edge Roller with red paint. With the stencil held down, roll over with paint.

3. Carefully remove the stencil revealing the design underneath and then let dry thoroughly. Repeat in a random pattern until you achieve the desired effect.

**THE MATERIALS**

- Wagner SMART Roller
- Wagner SMART Edge Roller
- Stencil of your choice
- Painter’s tape
- 1 gallon tan floor paint in a semi gloss finish
- 1 quart red floor paint in a semi gloss finish

Who needs a rug when a SMART Edge Roller adds dramatic design to a boring floor?
Give a fresh Christmas tree the look of a vintage holiday icon using a paint sprayer.

1. Tack drop cloth to a wall to create a spray background for working on the Christmas tree.

2. In the front end cup of the Wagner Home Décor sprayer, combine the Saltwash, water, and paint. Stir to mix thoroughly. Assemble the sprayer and begin to spray the tree.

3. Cut the netting off the tree and let the branches fall to a natural position, then resume spraying the entire tree turning the tree clockwise as you work.

THE MISSION

THE MATERIALS

Wagner Home Décor sprayer
Fresh Christmas tree
1 cup white latex paint
1 scoop Saltwash
4 cups water
Scissors
Drop cloth
A white tree really shows off colorful ornaments to their best effect, but Saltwash can be mixed with any color to create a beautiful tree. All of the ornaments were made using the Wagner heat gun. Find out how on page 22.
Commandeer a hardworking Forno heat gun and create wonderful foods, crafts, and gifts that will add a bit of sparkle to any cold winter day.
Create your own colorful Christmas ornaments with the Wagner Furno heat gun and some colorful crafts store beads.

Tools & Materials
- Wagner Furno Heat Gun
- Plastic craft beads in various sizes
- Cookie cutters in various shapes
- Paint mask
- Ice pick or bamboo skewer
- Twine or filament
- Pot holder

1. Assemble all the tools and materials on a paper-covered work surface.

2. Fill cookie cutter with beads (about 1/4 cup).

3. With the heat gun set to high, move and rotate the gun over the beads until they begin to melt. About 3-5 minutes depending on the composition of the beads.

4. Once the beads have melted to your desired look, let them reharden for 20 minutes. Then remove the cookie cutter to reveal the ornament.

5. Heat a small surface area of the ornament and make a hole using a wooden skewer or ice pick. Cool thoroughly and hang from twine or filament.

REMEMBER!
- Put on a mask and work by an open window.

Select one color choice of beads or mix and match colors to create a stained glass effect.

Great Gift Idea
Give the Wagner SprayTech Furno heat gun as a gift and attach a few of the premade ornaments as inspiration.
Create your own colorful Christmas ornaments with the Wagner Furno heat gun and some crayons.

1. Assemble all the tools and materials on a paper-covered work surface. Use an X-Acto knife to cut away the paper covers around the crayons.

2. Use a paring knife to cut crayons into chips and shards. Keep the color shards separate and decide where you want colors to appear inside the ornament before assembling.

3. Remove the top off the ornament and add the crayon shavings to the inside. 1–2 teaspoons is plenty.

4. Place a napkin over the glass votive to cradle the ball. With the heat gun on low, gently heat and roll the ornament until the crayon flakes become liquid (about 30–45 seconds). Swirl the liquid inside the ornament to coat the bottom half.

5. Let the first color solidify in the ornament for about one minute. Add a second color of crayon flakes to the top of the glass ball. Place the ornament atop a napkin and again heat and swirl. Let the crayon wax solidify and add a third or fourth color if desired. Tie a ribbon on the end or add an ornament hook to hang from a Christmas tree bough or in a window.
Candy Ornaments

Tools & Materials
Wagner Furno Heat Gun
Various holiday cookie cutters
Peppermint starlight candies
Ice pick or bamboo skewer
Twine or ribbon for hanging

Create your own colorful Christmas ornaments with the Wagner Furno heat gun and some peppermint candy.

Any hard candy can be transformed in the same fashion with the Furno heat gun. Use ornaments as table favors, gift tags, or to hang in a window.

1. Place starlight candies inside the cookie cutters.

2. With the heat gun set on high, heat the candies while keeping the tip of the gun about 2 inches above the surface of the candy. Move the gun over the candy for 1–2 minutes until the candy begins to barely melt.

3. Let the candy solidify in the cookie cutter for 10–20 minutes until fully cooled. Then, remove the newly formed candy ornament from the cookie cutter.

4. Heat the top of the ornament and use a skewer or ice pick to poke a hole through the ornament.

5. Let cool thoroughly again and hang with thread, ribbon, or twine.
**Decoupage Plates**

**Tools & Materials**
- Wagner Furno Heat Gun
- Glass plates in various sizes
- Paper ephemera
- Scissors
- Decoupage medium
- Paint brush
- Bowl of water
- Piece of sponge
- Plastic bowl scraper
- Copper or gold acrylic paint

These decorative dishes are perfect as trivets, serving wrapped candies, or displayed on a wall in a graphic arrangement.

1. Make a template for each plate by tracing the shape of the plate on paper first and cutting out the shape. Place the template over paper ephemera and cut out the design you want to transfer to the plate.

2. Place cut ephemera in a bowl of water to soak for one minute. Remove and let dry.

3. Wet a sponge in water and then apply the decoupage medium to the sponge. Flip the plate upside down and cover the bottom of the plate with decoupage medium, keeping the coating smooth.

4. Place the paper design upside down on the plate so that the image will show through.

5. Gently smooth any bubbles from the paper with a bowl scraper and use the Wagner Furno heat gun on low to dry paper art until fully dry.

6. Paint the edge of the plate with a bronze or gold paint. Dry completely with the heat gun. Wipe the glass clean if dirty.
Spice Candles

Tools & Materials
- Wagner Furno Heat Gun
- Pillar candles
- Ground cinnamon, nutmeg, and allspice
- Pods, cones, dried bay leaves, cinnamon bark
- Aluminum foil

Make your own decorative candles with a mix of dried herbs, spices and a Furno heat gun.

1. Place items on a clean work surface and be prepared to work quickly with warm wax.
2. With the heat gun on a low setting, melt the surface of candle. This happens quickly—work on small areas at a time.
3. Place acorn caps, spices, or cinnamon sticks directly onto the melted wax.
4. Then, quickly sprinkle the still-melted area with ground spices like cinnamon, nutmeg, or allspice. Then, allow the candle to reharden.

5. Alternatively, line a tray with aluminum foil and fill it with an assortment of ground spices. Melt the surface of the candle over low heat and then roll the surface of the candle in the spices to adhere them to the soft wax. For variations, apply dried bay leaves or other ornaments.

Mass multiple candles on a tray or platter to make an attractive centerpiece.
Toasted Cocoa Heart

Create a roasted and toasted finish on a Valentine heart decoration using cocoa powder and a heat gun.

Tools & Materials

- Wagner Furno Heat Gun
- Unfinished wood heart
- 3 Tbsp cocoa powder
- Paint brush
- Water

1. Place the wood heart flat on work surface. Mix the cocoa and some water together and brush on the wood surface.

2. With the heat gun on high, move the heat gun back and forth over the surface of the wood until the cocoa is toasted and the surface of the heart achieves your desired depth of color. About 3 minutes.

Hang the heart on a door, window, or cupboard.

Use this non-toxic cocoa and water stain to transform any unfinished furniture. The heat from the gun creates a rich, deep patina that is transformed to a hardened stain. Top with matte clear coat sprayed on.
Candy Heart Pops

Upcycle your Christmas candy canes into sweet Valentine day treats with the heat gun.

Tools & Materials
- Wagner Furno Heat Gun
- 12 candy canes in various styles
- Sharp paring knife
- Paint brush
- 2 cups white melting chocolate
- Colorful candy sprinkles
- Parchment paper
- 6 lollipop sticks

1. Arrange two candy canes in a heart shape on a clean surface.
2. Heat the straight ends of the candy canes on low heat for 30 seconds. With a sharp paring knife, carefully cut about 1 inch off the end of each candy cane.
3. Arrange the cut candy canes on parchment paper and place a lollipop stick at the base of the candy cane heart. Heat the candy canes over low heat again for 1 minute until the candy becomes soft and bendable. With your fingertips, press the warmed candy together at the top and bottom of the heart to make a frame for the chocolate.
4. Pour melted white chocolate into the middle of the heart.
5. Sprinkle the melted chocolate with colorful sugars and jimmies. Let harden for two hours.

Tie with ribbon or shrink wrap in plastic using the heat gun.
Design Challenge

Two designers, a Home Décor sprayer, and a basic box store side table looking for its own unique personality. Let the spray down begin.

Find it at Target and express yourself.

Cathe Holden

Lifestyle maven of the Inspired Barn in Petalum, California, Cathe was inspired by the wood grain drawers of the side table stand and instantly thought of old cigar boxes. She began by spraying the base of the unit leather brown and then applied decoupaged cigar box details with mod podge and the Furno heat gun.

Debra Norton

Maker, blogger, and DIY columnist for the Toronto Star app Star Touch, Debra instantly thought of the trendy color emerald green with a shiny lacquer. She began by using painter's tape to mask some of the wood finish to create graphic contrast on the legs and then loaded the sprayer with high gloss latex paint. A paint sprayer is the perfect way to mimic a lacquer finish, as it never has brush marks.
Rich and dark with a sense of vintage is a great way to describe Cathe Holden’s completed cigar box side table. The Home Décor sprayer and Furno heat gun made it all easy and doable. Find the cigar box printables in Cathe’s Etsy shop.

Tools & Materials
- Home Décor sprayer
- Furno heat gun
- Latex paint
- Painter’s tape
- Scissors
- Cigar box printables
- Mod Podge
- Piece of sponge

1. Tape off the drawers with painter’s tape.

2. Fill the Home Décor sprayer with latex paint and spray exposed wood.

3. Dip the cut cigar box printables in Mod Podge and apply them to the front of the drawers. Wipe over the decoupage with a damp sponge to remove any wrinkles.

4. Use the Furno heat gun to dry the decoupage. With the heat gun on a low setting, wave it over the design until dry.

Buy Cathe’s cigar box printables at Etsy.com/shop/catheholden
Debra Norton’s EMERALD SIDE TABLE

For Debra, color inspiration leads the transformation. “I crave the freshness of green, especially during winter’s darker days. It’s like a burst of spring, brightening your space and lifting your spirits in the middle of winter. The Home Décor sprayer makes it all possible.”

Tools & Materials
Home Décor sprayer
Latex paint
Painter’s tape
Brass “L” brackets
Gorilla glue

The Home Décor sprayer transforms an ordinary side table effortlessly.

1 Mask the bottom 3–4 inches of each table leg with painter's tape. Fill the Home Décor sprayer with latex paint and spray all of the exposed wood.

2 Allow paint to dry, then remove the painter's tape to expose the unpainted feet.

3 Apply Gorilla glue to the back of the brass “L” brackets and place on the corners of the drawers.
Can a boutique paint and décor shop change your life? If it's Brissonte', in North Reading, Massachusetts, it can. Owner Colleen Perry is a wizard of the decorative arts. With a full line of paints from Annie Sloan and a whole lot of know-how, she helps transform tired and old furnishings into French country heirlooms.

Shop Talk

For custom finishes, her son Robert takes the lead and uses the Wagner Furno heat gun for furniture stripping and the Home Décor sprayer for spraying pieces.

Dedicated to a life inspired by beauty and creativity, Colleen can consult on finishes, waxing, and different ways to embellish your furniture. Colleen is a Francophile and her shop shows the love. Amongst the well-selected decorative items is a flood of inspiration in the way of paints, embellishments, drawer knobs, and stencils.

A visit with Brissonte’, a boutique paint shop.

Brissonete' Gifts & Home Décor
161 Main Street, North Reading, MA
Visit brissonete.com for more information.
Robert used the Home Décor sprayer to give this French cabinet a fresh makeover with chalk paint sprayed both inside and out.

1. Wash and clean the interior and exterior of the cabinet. Wipe down with a tack cloth. Remove any shelves or drawers before spraying.

2. Begin by spraying the front of the piece, starting at the top and moving downward in horizontal rows. Keep the sprayer 3–4 inches away from the surface.

3. Repeat the same spraying technique on each side.

INTRODUCING THE REVOLUTIONARY FURNO® HEAT GUNS

With over 101 uses the Furno heat guns will have you removing, shaping and fixing almost everything on your project list. The possibilities are endless with adjustable temperature settings and fan speeds. The built-in stand also makes it perfect for tabletop projects. Learn more at WagnerFurno.com

PRECISE HEAT DELIVERY MAKES QUICK WORK OF ANY PROJECT.
