EXPLANATION OF SYMBOLS

Read all safety information before operating the equipment.
Save these instructions.

To reduce the risks of fire or explosion, electrical shock and the
injury to persons, read and understand all instructions included
in this manual. Be familiar with the controls and proper usage
of the equipment.

This symbol indicates a potential hazard
that may cause serious injury or loss of life.
Important safety information will follow.

This symbol indicates a potential hazard
to you or to the equipment. Important
information that tells how to prevent
damage to the equipment or how to avoid
causes of minor injuries will follow.

Danger of fire from solvent and paint fumes

Danger of explosion from solvent, paint
fumes and incompatible materials

Electric shock hazard

Notes give important information which
should be given special attention.

GROUNDING INSTRUCTIONS

This product must be grounded. In the event of an electrical
short circuit, grounding reduces the risk of electric shock by
providing an escape wire for the electric current. This product
is equipped with a cord having a grounding wire with an
appropriate grounding plug. The plug must be plugged into
an outlet that is properly installed and grounded in accordance
with all local codes and ordinances.

WARNING - Improper installation of the
grounding plug can result in a risk of electric
shock.

If repair or replacement of the cord or plug is necessary, do not
connect the green grounding wire to either flat blade terminal.
The wire with insulation having a green outer surface with
or without yellow stripes is the grounding wire and must be
connected to the grounding pin.

Check with a qualified electrician or serviceman if the grounding
instructions are not completely understood, or if you are in
doubt as to whether the product is properly grounded. Do not
modify the plug provided. If the plug will not fit the outlet,
have the proper outlet installed by a qualified electrician.

This product is for use on a nominal 120 volt circuit and has a
grounding plug that looks like the plug illustrated below. Make
sure that the product is connected to an outlet having the same
configuration as the plug. No adapter should be used with this
product.

IMPORTANT ELECTRICAL INFORMATION

Use only a 3-wire extension cord that has a 3-blade grounding
plug and a 3-slot receptacle that will accept the plug on the
product. Make sure your extension cord is in good condition.
When using an extension cord, be sure to use one heavy enough
to carry the current your product will draw. An undersized cord
will cause a drop in line voltage resulting in loss of power and
overheating. A 14 gauge or 12 gauge cord is recommended. If
an extension cord is to be used outdoors, it must be marked with
the suffix W-A after the cord type designation. For example, a
designation of SJTW-A would indicate that the cord would be
appropriate for outdoor use.

Household use only. Intended for indoor/
outdoor use ONLY with materials having
flashpoint above 100°F (38°C).
IMPORTANT SAFETY INFORMATION

SAFETY HAZARDS

HAZARD: EXPLOSION OR FIRE
Flammable vapors, such as solvent and paint vapors, in work area can ignite or explode.

PREVENTION:
• Do not spray flammable or combustible materials near an open flame, pilot lights or sources of ignition such as hot objects, cigarettes, motors, electrical equipment and electrical appliances. Avoid creating sparks from connecting and disconnecting power cords.
• For use with only water-based or mineral spirit-type materials with a minimum flash point of 100ºF (38ºC) — Do not spray or clean with liquids having a flash point of less than 100ºF (38ºC). Flash point is the temperature at which a fluid can produce enough vapor to ignite.
• Verify that all containers and collection systems are grounded to prevent static discharge.
• Connect to a grounded outlet and use grounded extension cords (electric models only). Do not use a 3 to 2 adapter.
• Keep spray area well ventilated. Keep a good supply of fresh air moving through the area to keep the air within the spray area free from accumulation of flammable vapors.
• Do not smoke in the spray area.
• Do not operate light switches, engines, or similar spark producing products in the spray area.
• Keep area clean and free of paint or solvent containers, rags, and other flammable materials.
• Know the contents of the paint and solvents being sprayed. Read all material Safety Data Sheets (SDS) and container labels provided with the paints and solvents. Follow the paint and solvent manufacturer’s safety instructions.
• Fire extinguisher equipment shall be present and working.

HAZARD: ELECTRIC SHOCK
This product can cause injury due to electric shock.

PREVENTION:
• Never expose the equipment to rain. Store indoors.
• Keep electrical cord plug and spray gun trigger free from paint and other liquids. Never hold the cord at plug connections to support the cord. Failure to observe may result in an electrical shock.

PREVENTION:
• Always wear appropriate gloves, eye protection, clothing and a respirator or mask when painting. Hazardous vapors – Paints, solvents, insecticides, and other materials can be harmful if inhaled or come in contact with body. Vapors can cause severe nausea, fainting or poisoning.
• Do not operate or spray near children. Keep children away from equipment at all times.
• Do not overreach or stand on an unstable support. Keep effective footing and balance at all times.
• Stay alert and watch what you are doing.
• Do not operate the unit when fatigued or under the influence of drugs or alcohol.
• Never aim spray gun at any part of the body.
• Follow all appropriate local, state, and national codes governing ventilation, fire prevention, and operation.
• The United States Government Safety Standards have been adopted under the Occupational Safety and Health Act (OSHA). These standards, particularly part 1910 of the General Standards and part 1926 of the Construction Standards should be consulted.
• Use only manufacturer authorized parts. User assumes all risks and liabilities when using parts that do not meet the minimum specifications and safety devices of the turbine manufacturer.
• Power cord must be connected to a grounded circuit.
• Do not spray outdoors on windy days.
**CONTROLS AND FUNCTIONS**

- **Material flow control**
- **Trigger**
- **Material container (1.5 quart)**
- **Turbine**
- **X-Boost™ power switch**
- **ON/OFF switch**
- **Filter housing**
- **Cover release**
- **Spray width lever**
- **Air cap**
- **Lock N Go tab**
- **Material flow control**
- **Trigger**
- **Material container (1.5 quart)**

**iSpray® Nozzle**
(for large projects)

- **iSpray Nozzle**
  - Designed to provide a roller-like finish on broad indoor and outdoor surfaces. Sprays un-thinned materials including un-thinned latex.

- **Detail Finish Nozzle**
  - Included in some models
  - Ideal for detail projects and finer finishes. It is designed for spraying thinner materials, such as oil based stains and paints. The Detail Finish nozzle leaves a smoother finish.

- **X-Boost™ Power Switch**
  - The X-Boost power switch adjusts the level of air power produced by the turbine.
  - This FLEXiO sprayer is equipped with a 2-speed air power control.
  - **LO = I**
  - **HI = II**
CONTROLS AND FUNCTIONS

ON / OFF SWITCH
The ON/ OFF switch turns the turbine ON (1) and OFF (0). No spray material will be delivered until trigger is pulled.

MATERIAL FLOW CONTROL
The material flow control determines the amount of spray material that is sprayed from the spray nozzle.

iSpray Nozzle - The material flow can be adjusted incrementally from 1 (minimum) to 12 (maximum) by turning the adjustable material flow control.

Detail Finish Nozzle (if included) - Set the material flow by turning the red knob on the trigger of the spray gun.

TRIGGER
Pulling the trigger will deliver material from the material container to the nozzle assembly, where it is sprayed.

SPRAY WIDTH LEVER (iSpray Nozzle Only)
The spray width lever determines the width of the spray pattern.

ADJUSTMENT RING
The spray pattern shape is adjusted by turning the adjustment ring to either the vertical, horizontal or diagonal* positions.

Horizontal pattern (use ‘up and down’ spraying motion)

Vertical pattern (use ‘side to side’ spraying motion)

*Round pattern - Detail Finish nozzle only, if included (Use ‘up and down’ or ‘side to side’ spraying motion)
SETUP

For a video showing how to set up the FLEXiO Handheld Sprayer, visit:

www.wagnerspraytech.com/flexio

MATERIAL PREPARATION

Material to be sprayed may need to be strained to remove any impurities in the paint which may enter and clog the system. Impurities in the paint will give poor performance and a poor finish.

SPRAYABLE MATERIALS (WATER AND OIL-BASED)

- Semi-Transparent stain
- Solid stains
- Lacquers
- Urethanes
- Decorative paints
- Latex and oil-based paints

*THINNING THE MATERIAL

Before spraying, the material being used may need to be thinned. Never exceed the thinning advice given by the coating manufacturer.

If thinning is necessary, use the proper solvent as specified by the material manufacturer.

Only thin the material if absolutely necessary to improve spray performance. Optimal spray performance should be achieved simply by adjusting the various controls on the unit.

Do not thin with materials that have a flashpoint below 100°F (38°C).
ASSEMBLY

- **NEVER** point the spray gun at any part of the body. Make sure the power cord is unplugged.

1. Stir the spraying material thoroughly.
2. Fill the container. Use a strainer to remove any particles. (see **Thinning the Material**, previous page, if thinning is required).
3. Align the pickup tube -
   - **A** If spraying downward, the angled end of the pickup tube should be pointing toward the front of the nozzle.
   - **B** If spraying upward, the angled end of the pickup tube should be pointing toward the rear of the nozzle.

   - Make sure the pickup tube is inserted as far as it will go to ensure a tight fit.

   - Never tip the sprayer at more than a 45° angle. Material could get into the turbine and damage the sprayer.

4. Carefully screw the cup back onto the nozzle assembly. Tighten firmly.
5. Align the nozzle and the turbine approximately as shown.
6. Insert and twist the nozzle into the turbine toward the “lock” symbol on the turbine. The tab below the trigger will lock the two pieces into place.

   - Do not pull trigger at any time if the turbine is not running. Paint will drip from the nozzle.
SPRAYER CONTROLS

For a video showing FLEXiO spraying tips and best practices, visit: www.wagnerspraytech.com/flexio

X-BOOST™ POWER SWITCH

The X-Boost™ power switch adjusts the level of air pressure produced by the turbine. The X-Boost™ power dial is factory-set at maximum out of the box.

2-Speed Air Power Control - The FLEXiO Handheld Sprayer is equipped with a 2-speed air power control (high / low).

• A high air power level (II) will result in faster coverage and a smoother finish with thicker materials.

• Lowering the air power (I) will result in larger drops of material being sprayed from the gun, and will create a slightly rougher finish.

Tip: The thicker the material you are spraying, the higher the turbine power you will need.

Tip: For fine-finish work with thinner materials, you may want to decrease the air power. Spraying a thinner material at high air power will result in more overspray. Overspray is sprayed material that does not stick to the spray surface and bounces back.

MATERIAL FLOW CONTROL

The material flow control will be factory-set at its lowest setting out of the box. Adjust as needed.

• Turn the knob out (counterclockwise) for less flow. Generally, low material flow is needed for spraying smaller surface areas, such as corners, lattice, or spindles.

• Turn the knob in (clockwise) for increased flow. Generally, high material flow is needed for spraying large surface areas, such as fences and decks.
SPRAYER CONTROLS

PATTERN ADJUSTMENT

Adjust the spray pattern by turning the air cap ears. The air cap position will determine the movement direction of the spray gun. The spray width lever on the iSpray nozzle determines the width of the spray pattern.

1. **Vertical pattern:**
   Use side-to-side motion during spraying.

2. **Horizontal pattern:**
   Use up and down motion during spraying.

3. **Narrow pattern** (set spray width lever to narrow):
   Use up and down, or side to side spraying motion, depending upon the object being sprayed.

4. **Narrow pattern** (Detail Finish nozzle, if included) - set the air cap to the diagonal position.
   Use up and down, or side to side spraying motion, depending upon the object being sprayed.
HOW TO SPRAY PROPERLY

- Turn the ON/OFF switch to ON (I) to turn on the turbine. No material will spray until the trigger is activated.
- Position the spray gun perpendicular to the spray surface.
- Spray parallel to the surface with straight and full passes at a consistent speed as illustrated, right.
- Always apply a thin coat of material on the first pass and allow to dry before applying a second, slightly heavier coat.
- When spraying, always trigger the spray gun after the spray pass has begun and release the trigger before stopping the pass. Always keep the gun pointed squarely at the spray surface and overlap passes by 50% to obtain the most consistent and professional finish possible.

Frequently wipe the nozzle tip with a damp rag when spraying to remove dried material.

PRACTICE YOUR TECHNIQUE

Practice your technique (use provided poster).
- **Get closer.** The spray gun should be 6-8 inches away from the spray object.
- **Full passes.** Spray the material in straight and full passes, not short waves.
- **Light coats.** For a finer finish, coat lightly during first pass, then cover completely on second pass.

DO NOT pull the trigger when the turbine is turned OFF. Spray material will leak from the nozzle.

If after following the guidelines on these two pages you are still not getting the spray performance you need, refer to the ‘Troubleshooting’ section on page 13.
For a video showing cleanup of the FLEXiO Handheld Sprayer, visit:
www.wagnerspraytech.com/flexio

CLEANUP NOTES

When cleaning, use the appropriate cleaning solution (warm, soapy water for water-based coatings, and mineral spirits for oil-based coatings.

Special cleanup instructions for use with flammable solvents (must have a flashpoint above 100°F (38°C):
• Always flush spray gun outside.
• Area must be free of flammable vapors.
• Cleaning area must be well-ventilated.
• Do not submerge turbine!

For basic quick-cleaning between color changes, fill the material container with cleaning solution and spray the cleaning solution through the gun and into a waste container.

1. Turn turbine OFF. Separate the turbine from the nozzle.
   Remove the container and empty any remaining material.
   Thoroughly rinse the material container with warm, soapy water (or mineral spirits for oil-based materials).

2. Disassemble the spray gun and clean all parts with warm soapy water (or mineral spirits for oil-based materials).
   Reassemble all parts when clean.

3. Clean the air vent (a) on the suction tube with a soft bristled cleaning brush.

4. Clean the rear of the nozzle (b) with the appropriate cleaning solution. Use a thin layer of petroleum jelly to lubricate the O-ring (c).
MAINTENANCE

CLEANING THE FILTER

Attention
Before every use, you should inspect the air filter in the turbine to see if it is excessively dirty. If it is dirty, follow these steps to replace it.

Never operate your unit without the air filters. Dirt could be sucked in and interfere with the function of the unit.

1. Press the tabs at the rear of the turbine. Slide the rear housing off of the back of the turbine.

2. Remove the dirty filter from the turbine and replace with a new one. The smooth side of the air filter must be placed toward the turbine.

Secure the cover back onto the turbine.

CLEANING THE AIR VALVE TUBE

If spray material ever enters the air valve tube, follow the steps below.

1. Pull the air tube (a) at the top from the nozzle. Screw off the valve cover (b).

Remove the valve seal (c). Clean all the parts carefully. Make sure to remove any material from valve seal housing area (d).

Attention
The air tube and valve seal (c) are only solvent-resistant to a limited extent. Do not immerse in solvent, only wipe.

2. Place the valve seal (c) in the valve cover (b) with the pin facing into the tube. Installing the valve seal into the valve cover will be much easier if the valve cover is inverted.

3. Turn the nozzle upside down and screw on the valve cover (with valve seal inside) from underneath. Turning the nozzle upside down will prevent the valve seal from falling out of the valve cover during reinstallation.

4. Place the air tube on the valve cover and on the nipple at the nozzle.
## TROUBLESHOOTING

<table>
<thead>
<tr>
<th>PROBLEM</th>
<th>CAUSE</th>
<th>SOLUTION</th>
</tr>
</thead>
</table>
| Problem A: Little or no material flow                                    | 1. Nozzle clogged.  
2. Suction tube clogged.  
3. Material flow setting too low.  
4. Suction tube loose.  
5. No pressure build up in container.  
6. Air filter clogged.  
7. Spray material too thick.  
8. Nozzle seal missing or worn. | 1. Clean.  
2. Clean.  
3. Increase material flow setting.  
4. Remove and replace as tightly as possible.  
5. Tighten container. Check the air vent hole on the pick up tube - clean if clogged.  
6. Change  
7. Thin*.  
8. Replace nozzle. |
| Problem B: Material leaking                                              | 1. Nozzle loose.  
2. Nozzle worn.  
3. Nozzle seal missing or worn.  
4. Material build-up on air cap and nozzle | 1. Tighten.  
2. Replace.  
3. Replace nozzle.  
| Problem C: Spray pattern too thick, runs and sags                        | 1. Material flow setting too high.  
2. Air power setting too low.  
3. Applying too much material.  
5. Air filter clogged.  
6. Too little pressure build-up in container.  
7. Spray material too thick. | 1. Decrease material flow setting.  
2. Increase air power setting.  
3. Adjust material flow or increase movement of spray gun.  
5. Change.  
6. Tighten container.  
7. Thin*. |
| Problem D: Spray jet pulsates                                           | 1. Material in container running out.  
2. Change. |
| Problem E: Too much overspray                                           | 1. Gun too far from spray object. | 1. Reduce distance (6”-8” is ideal). |
| Problem F: Pattern is very light and splotchy                           | 1. Moving the spray gun too fast.  
2. Material flow setting too low.  
3. Air power setting too high. | 1. Adjust material flow or decrease movement of spray gun.  
2. Increase material flow setting.  
3. Decrease air power setting. |

*Only thin the material as a last resort to improve spray performance. Optimal spray performance should be achieved simply by adjusting the various controls on the unit.

This unit contains no servicable electrical parts. Do not attempt to service yourself. Store indoors with the cord wrapped around the turbine handle.

Have you tried the recommendations above and are still having problems? In the United States, to speak to a customer service representative, call our Technical Service at 1-800-328-8251. See www.wagnerspraytech.com in the “Contact Us” section for Technical Service hours.

LIMITED WARRANTY • GARANTIE LIMITÉE • GARANTÍA LIMITADA

PAINT SPRAY EQUIPMENT

This product, manufactured by Wagner Spray Tech Corporation (Wagner), is warranted against defects in material and workmanship for one year following date of purchase if operated in accordance with Wagner’s printed recommendations and instructions. This warranty does not cover damage resulting from improper use, accidents, user’s negligence or normal wear. This warranty does not cover any defects or damages caused by service or repair performed by anyone other than a Wagner Authorized Service Center.

ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE IS LIMITED TO ONE YEAR FOLLOWING DATE OF PURCHASE. WAGNER SHALL NOT IN ANY EVENT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES OF ANY KIND, WHETHER FOR BREACH OF THIS WARRANTY OR ANY OTHER RESPONSIBILITY. THIS WARRANTY DOES NOT APPLY TO ACCESSORIES.

THIS PRODUCT IS DESIGNED FOR HOME USAGE ONLY. IF USED FOR COMMERCIAL OR RENTAL PURPOSES, THIS WARRANTY APPLIES ONLY FOR 30 DAYS FROM DATE OF PURCHASE.

If any product is defective in material and/or workmanship during the applicable warranty period, return it with proof of purchase, transportation prepaid to any Wagner Authorized Service Center. (Service Center listing is enclosed with this product.) Wagner’s Authorized Service Center will either repair or replace the product (at Wagner’s option) and return it to you, postage prepaid.

SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS OR THE EXCLUSION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION AND EXCLUSION MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS WHICH VARY FROM STATE TO STATE.

PULVÉRISATEUR DE PEINTURE

Cet article fabriqué par Wagner Spray Tech Corporation (Wagner) est garanti contre tout défaut de fabrication et de matériaux pour une période d’un an suivant la date d’achat, à condition qu’il soit utilisé conformément aux recommandations et aux instructions écrites de Wagner. La garantie ne couvre pas les dommages résultant d’un mauvais emploi, d’un accident, d’une négligence de la part de l’utilisateur ou de l’usure normale de l’article. Elle ne couvre pas non plus les défauts ou les dommages découplants de services d’entretien ou de réparations assurées par tout autre établissement qu’un centre de service après-vente agréé de Wagner.

TOUTE GARANTIE TACITE RELATIVE AUX QUALITÉS MARCHandes OU À L’UTILISATION DE CE PRODUIT DANS UN BUT PARTICULIER N’EST VALABLE QUE POUR UNE PÉRIODE D’UN AN À COMPTER DE LA DATE D’ACHAT. WAGNER NE SAURAIT ÊTRE TENU RESPONSABLE DES DOMMAGES FORTUITS OU INDIRECTS QUELS QU’ILS SOIENT, QUE CE SOIT POUR INOBSERVATION DE LA PRÉSENTE GARANTIE OU POUR TOUTE AUTRE RAISON. LA GARANTIE NE COUvre PAS LES ACCESSOIRES.

CET ARTICLE A ÉTÉ CONCU EXCLUSIVEMENT EN VUE D’UN USAGE DOMESTIQUE. LA GARANTIE NE SERA VALABLE QUE POUR 30 JOURS À COMPTER DE LA DATE D’ACHAT DE L’ARTICLE EST UTILISÉ À DES FINS COMMERCIALES OU DE LOCATION.

Tout article comportant des défauts de fabrication ou de matériaux au cours de la période de garantie applicable peut être retourné en port payé à un centre de service après-vente agrée de Wagner, accompagné de la preuve d’achat (une liste des centres de service après-vente accompagne cet article). Le centre de service après-vente agrée de Wagner vous renverra l’article en port payé, après l’avoir réparé ou remplacé (ce choix étant à la discrétion de Wagner).

COMME LES LIMITES DE TEMPS RELATIVES À UNE GARANTIE TACITE OU À L’EXCLUSION DES DOMMAGES DE NATURE FORTUITE OU INDIRECTE N’ONT PAS NÉCESSAIREMENT COURS DANS TOUTES LES PROVINCES, IL SE PEUT QUE LESDITES LIMITES OU EXCLUSIONS NE VOUS CONCERNENT PAS. CERTAINS DROITS PARTICULIERS VOUS SONT DÉVOLUS EN VERTU DE LA PRÉSENTE GARANTIE ET PEUVENT S’ACCOMPAGNER D’AUTRES DROITS EN FONCTION DE LA PROVINCE OÙ VOUS RÉSIDEZ.

EQUIPO DE ATOMIZACIÓN DE PINTURA

Este producto, fabricado por la Wagner Spray Tech Corporation (Wagner), está garantizado contra defectos de materiales y de mano de obra por un año a partir de la fecha de compra siempre y cuando se utilice de acuerdo con las recomendaciones e intrucciones impresas de Wagner. Esta garantía no cubre daños ocasionados por el uso incorrecto, accidentes, negligencia por parte del usuario o el desgaste normal. Esta garantía no cubre cualquier defecto o daño ocasionado por el servicio o las reparaciones llevadas a cabo fuera de un Centro de Servicio Wagner Autorizado.

CUALQUIER GARANTÍA IMPLÍCITA RELATIVA AL POTENCIAL COMERCIAL O ADAPTABILIDAD PARA UN USO PARTICULAR SE LIMITA A UN AÑO A PARTIR DE LA FECHA DE COMPRA. WAGNER EN NINGÚN CASO SERÁ RESPONSABLE DE CUALQUIER DAÑO DIRECTO O INDIRECTO DE CUALQUIER TIPO, YA SEA POR VIOLACIÓN DE ESTA GARANTÍA O CUALQUIER OTRA RAZÓN. ESTA GARANTÍA NO SE APLICA A LOS ACCESORIOS.

ESTE PRODUCTO ESTÁ DISEÑADO PARA SER UTILIZADO EN EL HOGAR ÚNICAMENTE. SI SE UTILIZA PARA PROPÓSITOS COMERCIALES O DE ALQUILER, ESTÁ GARANTÍA ES VÁLIDA ÚNICAMENTE DURANTE 30 DÍAS A PARTIR DE LA FECHA DE COMPRA.

Si cualquier producto está defectuoso con respecto a los materiales o mano de obra, regréselo porte pagado junto con el recibo de compra a cualquier Centro de Servicio Wagner Autorizado (la lista de Centros de Servicio se adjunta con este producto). El Centro de Servicio Wagner Autorizado reparará o reemplazará el producto (a la discreción de Wagner) y se le regresará porte pagado.

ALGUNOS ESTADOS, DEPARTAMENTOS O PROVINCIAS NO PERMITEN LIMITACIONES EN CUANTO AL PERÍODO DE VALIDEZ DE UNA GARANTÍA IMPLÍCITA NI LA EXCLUSIÓN DE DANOS DIRECTOS O INDIRECTOS. POR LA TANTO, LA LIMITACIÓN Y LA EXCLUSIÓN ANTERIOR Pueden NO APLICARSE A USTED. ESTA GARANTÍA LE OTORGA DERECHOS LEGALES ESPECÍFICOS Y USTED TAMBIÉN PUEDE TENER OTROS DERECHOS QUE VARÍAN DE UNA LOCALIDAD A OTRA.
